

NAME _____

A Level Geography: Summer Task 2017

Briefly explain how each of the below can be used as evidence for previous changes to the earth's climate?

| | |
|--------------------|--|
| Soil samples | |
| Ice cores | |
| Historical records | |
| Animal species | |

Research essay (Handwritten on one side of A4):

Quote by Nobel Prize Winner For Chemistry, Kary Mullis: *"Global warmers predict that global warming is coming, and our emissions are to blame. They do that to keep us worried about our role in the whole thing. If we aren't worried and guilty, we might not pay their salaries. It's that simple."*

Write a report, using evidence, arguing AGAINST human caused climate change

- You might want to use the following to help – Sunspot Theory, Eruption Theory, The Albedo Effect
